# Author Index Volume 28

(The issue number is given in front of the page numbers)

**Alvarez, L.H.R.,** On the form and risk-sensitivity of zero coupon bonds for a class of interest rate models (1) 83–90
**Andrade, J.M.,** see Centeno, M.L. (3) 341–350

**Booth, P.** and **D. Walsh,** An option pricing approach to valuing upward only rent review properties with multiple reviews (2) 151–171
**Boulier, J.-F., S. Huang** and **G. Taillard,** Optimal management under stochastic interest rates: the case of a protected defined contribution pension fund (2) 173–189

**Cai, J.,** see Willmot, G.E. (3) 361–379
**Carrière, J.F.,** Transition probability functions for martingale laws of bond prices (3) 393–399
**Centeno, M.L.** and **J.M. Andrade,** Bonus systems in an open portfolio (3) 341–350

**Denuit, M., J. Dhaene** and **C. Ribas,** Does positive dependence between individual risks increase stop-loss premiums? (3) 305–308
**Dhaene, J.,** see Denuit, M. (3) 305–308

**Felipe, A., M. Guillen** and **J.P. Nielsen,** Longevity studies based on kernel hazard estimation (2) 191–204

**Garrido, J.,** see Léveillé, G. (2) 217–231
**Goulet, V.,** A generalized crossed classification credibility model (2) 205–216
**Guillen, M.,** see Felipe, A. (2) 191–204

**Haberman, S.,** see Vigna, E. (2) 233–262
**Haberman, S.,** see Zimbidis, A. (2) 263–280
**Huang, S.,** see Boulier, J.-F. (2) 173–189
**Hürlimann, W.,** Distribution-free comparison of pricing principles (3) 351–360

**Iwaki, H., M. Kijima** and **Y. Morimoto,** An economic premium principle in a multiperiod economy (3) 325–339

**Kaluszka, M.,** Optimal reinsurance under mean-variance premium principles (1) 61–67
**Kijima, M.,** see Iwaki, H. (3) 325–339

**Lefèvre, C.,** and **S. Utev,** Comparison of individual risk models (1) 21–30
**Li, Y.** and **A.G. Pakes,** On the number of near-maximum insurance claims (3) 309–323
**Léveillé, G.** and **J. Garrido,** Moments of compound renewal sums with discounted claims (2) 217–231

**Morimoto, Y.,** see Iwaki, H. (3) 325–339
**Møller, T.,** On transformations of actuarial valuation principles (3) 281–303
**Müller, A.** and **G. Pflug,** Asymptotic ruin probabilities for risk processes with dependent increments (3) 381–392

**Nielsen, J.P.,** see Felipe, A. (2) 191–204

**Pakes, A.G.,** see Li, Y. (3) 309–323
**Pflug, G.,** see Müller, A. (3) 381–392

**Ribas, C.,** see Denuit, M. (3) 305–308

**Schmidli, H.,** Distribution of the first ladder height of a stationary risk process perturbed by $\alpha$-stable Lévy motion (1) 13–20
**Schweizer, M.,** From actuarial to financial valuation principles (1) 31–47
**Sherris, M.,** see van der Hoek, J. (1) 69–82

**Taillard, G.,** see Boulier, J.-F. (2) 173–189
**Tsai, C.C.-L.,** On the discounted distribution functions of the surplus process perturbed by diffusion (3) 401–419

Elsevier Science B.V.
PII: S0167-6687(01)00077-4

**Utev, S.,** see Lefèvre, C. (1) 21–30

**van der Hoek, J.** and **M. Sherris,** A class of non-expected utility risk measures and implications for asset allocations (1) 69–82

**Vigna, E.** and **S. Haberman,** Optimal investment strategy for defined contribution pension schemes (2) 233–262

**Walsh, D.,** see Booth, P. (2) 151–171

**Wang, G.,** A decomposition of the ruin probability for the risk process perturbed by diffusion (1) 49–59

**Willmot, G.E.** and **J. Cai,** Aging and other distributional properties of discrete compound geometric distributions (3) 361–379

**Zaks, A.,** Annuities under random rates of interest (1) 1–11

**Zimbidis, A.** and **S. Haberman,** The combined effect of delay and feedback on the insurance pricing process: a control theory approach (2) 263–280
